

Our enterprise has created several kinds of PATTONES: they are waterproof, flexible, easy to put on and carry out, due its light weight. They are used mainly **for the agricultural and livestock tasks, gardens, farms, hunting, fishing, construction, etc.** They are specially designed for muddy tasks.

They are made with fibers that repel mud and dirt.
Recommendation: use Pattones with a thick boot, so they can fit perfectly and obtain a better resistance and durability. **After use rinse with water.**
